Axonics Therapy offers an advanced treatment solution for you.

Axonics Therapy is indicated for patients who have not responded to more conservative treatments for bladder and bowel control, such as lifestyle adjustments, physical therapy, or medications.

**How does it work?**

Overactive bladder, fecal incontinence and urinary retention may be caused by abnormal communication between the brain and bladder or bowel.

Axonics Therapy can help restore normal communication by providing gentle stimulation to help control your symptoms.

**Who does it help?**

Axonics Therapy is approved to help people with:

- Overactive bladder
- Urinary retention
- Urinary urgency frequency
- Urinary urgency incontinence
- Bowel incontinence

**Clinically proven. Patient approved.**

89% of patients achieved clinically significant improvements*¹

93% of patients were satisfied with their therapy¹

*50% or greater reduction in symptoms at 1 year

**The Axonics Advantage**

**Long-term therapy**

Designed to deliver therapy for at least 15 years, providing a long-term solution for your symptoms.

**Small size**

Safely delivers therapy with a miniaturized implant that’s about the same size as a quarter.

**Full-body MRI**

An implant that allows for you to have a full-body MRI† under certain conditions.

**Try it out first**

A discreet and disposable device that lets you experience first-hand if this therapy works for you.

**User-friendly**

Simple tools for a user-friendly way to manage your therapy.

**Easy charging**

Wireless charging experience.
Get Connected with an Axonics Ambassador

Would you like to connect with someone who understands the unique challenges of living with bladder or bowel dysfunction and learn about their experience with Axonics Therapy?

Patient Ambassadors, just like Jill, are volunteers who are ready to speak with you to share their real-life experiences with Axonics Therapy.

Contact Axonics by calling toll free at 1-877-9-AXONICS or by visiting www.axonics.com/ambassadors to get connected.

Important Information

Results and experiences may vary and are unique to each patient. No promise or guarantee is made about specific results or experiences. Talk to your doctor about whether the Axonics System is right for you and to discuss the potential risks and benefits.

For more information about safety and potential risks, go to: www.axonics.com/isi.

Reference:

Important Safety Information:

Indications: Axonics SNM Therapy for urinary control is indicated for the treatment of urinary retention and the symptoms of overactive bladder, including urinary urge incontinence and significant symptoms of urgency-frequency alone or in combination, in patients who have failed or could not tolerate more conservative treatments. Axonics SNM Therapy for bowel control is indicated for the treatment of chronic fecal incontinence in patients who have failed or are not candidates for more conservative treatments.

Contraindications: The Axonics SNM System is contraindicated for patients who have not demonstrated an appropriate response to test stimulation; or Patients who are unable to operate the Axonics SNM System.

Caution: Federal law (USA) restricts this device to sale by, or on the order of, a physician.

For a complete list of warnings, precautions, and potential adverse events, refer to the device manual or visit www.axonics.com/isi.
